Clean Up!
Stay Organised.

Have you tried Saniclean60 Sanitiser? Formulated to Kill 99.9% of Bacteria and Viruses including Rotavirus and Influenza.

Included in the formula are surface active agents which combine with the germicidal compounds to effectively clean and deodorise. Saniclean60 has a medium pH, is safe and pleasant to use and leaves all washable surfaces hygienically clean and streak free.

Use Saniclean60 in washrooms, toilets, urinals, showers, change rooms, rubbish bins, bars, sinks, drains and garbage disposal areas.

Directions for use: Dilute 1 part to 60 parts water. Spray on or apply with cloth or sponge and thoroughly wet surface for 5 minutes and wipe off using a clean cloth. (Code: 054316)

Kills 99.9%

and viruses

Sanilaun

Sanilaun is a laundry liquid,
designed to kill 99.9% of
bacteria and germs.

Made with an inbuilt softener.
(Code: 054319)

Kills 99.9%
of bacteria
and germs!

A natural occurring sanitiser!

Biosan Non Rinse Food Safe Sanitiser

A natural occurring sanitiser, extracted from the skins of citrus products, leaving a food safe non-toxic film which prevents bacteria from multiplying.

It is completely non-toxic and acts mechanistically by destroying the cellular membrane of the micro-organism. The antimicrobial power is due to a synergistic action created by the “reaction” of bioflavonoids and natural organic acids present.
(Code: 054302)

S Clean

Ready to Use surface sanitizer and cleaner that is effective in reducing bacteria in food preparation, storage and eating areas.

Correctly diluted S Clean may be used as a non-rinse sanitizer on pre-cleaned food contact surfaces. A wide variety of applications are found in the food industry including cleaning and sanitizing of food preparation areas, benches, table tops and all surfaces that are determined HACCP areas.

Use also to clean and sanitize food cupboards, refrigerators, tables, chairs and waste disposals.

S Clean is also an effective deodorizer and kills bacteria and odour in rubbish disposal bins.
(Code: 1031460)

Reduces bacteria in food areas

Nano Wipes contain 75% alcohol!

Floor scrubbing reinvented!

The first of its kind, the i-mop solves the problems of floor cleaning systems by combining the flexibility of a mop with the power and speed of industrial scrubber driers. Most areas are still being cleaned by mop and bucket, because most floor cleaning machines are just not flexible enough to work in most spaces. The i-mop combine ergonomic design with performance and makes it possible to clean any surface, with freedom of movement and great ease of use. This machine isn't just designed for cleaning, it's designed for the cleaner.

The I-Mop is challenging the conventional commercial cleaning floor cleaning method and always striving for excellence in the cleaners' experience and efficiency in cleaning. (Code: 120990)

The I-Mop Hard Floor Cleaner 5 Litre (Code: 120220) is the recommended floor cleaning chemical.

Dark Blue: 531416, Green: 531414. Red: 531413

Have you tried colour-coded cleaning?

Different coloured equipment in certain areas within a facility can greatly decrease the risks of cross contamination! Cleaning at facilities such as food-service, healthcare, aged care, offices and accommodation; anywhere health and safety is important.

A cleaning system is so easy to learn, regardless of the level of diversity across staff within your facility, colour is universal and easy to learn and identify. Plus it is not an incremental expense! Your staff will already be using wipes across the areas of your facility, introducing a colour coded cleaning program will simply change behaviour to use different coloured wipes when in different zones.

The health and safety of your staff and customers is vitally important, as is the reputation of your facility. It's considered best practice and viewed highly favorably as it adds an additional layer of protection against cross contamination. It essentially becomes a part of your facilities standard operating procedures.

Keep it simple though, try to have a different colour only when cross-contamination is a concern. Too many colours is going to be confusing.

Provide a cheat sheet that explains colours and zones so use signage to keep your new colour coded cleaning system front of mind with your team is to have it posted in high traffic areas.

The colour coding of cleaning equipment is simple yet so effective! The identification of cleaning equipment for use in different areas will reduce the risk of cross contamination and infection in your environments.

How about using blue for general hygiene areas. And try Red for sanitising areas and Yellow for infectious control. Green for commercial kitchens and brown for cafes.

Visit www.virtueplusorders.com.au to view more colour coded cleaning options.

Avoid Sharing Germs.
Use Individually Wrapped & Disposable!

Individually Wrapped & Disposable Options!

Dairy Farmers UHT Milk portions are single servings of long life milk. These are available in cartons of 240 and ideal for guest amenities in resorts, motels and hotels.

(Code: 873150)

Stock up on small cartons of Pauls 200ml UHT milk. Available in packs of 24. (Code: 883126)
