

7 Steps to Doing it Right

Dishwashing Procedure Chart

1

PREPARE

- Check the scrap trays are clean
- Fill the machine with water
- Check detergent feeder is on
- Run empty wash cycle

2

SCRAPE

- Remove all food scraps
- Rinse

3

SOAK

- Items with hard to remove stains should be soaked in Dominish
- Do not use manual dishwashing detergent

4

RACK

- Rack according to size
- Plates to be placed leaning backwards
- Bowls and cups placed inverted
- Cutlery placed upright
- **DO NOT OVERLOAD RACK**

5

WASH

- Wash temperature 60°C
- Rinse temperature 82°C
- Check detergent levels

6

DRY

- Allow to drain
- Store dry dishware in a clean area for reuse
- At the end of a meal session:
 - Turn off machine
 - Empty the tank
 - Check and clean scrap trays

7

CLEAN

- At the end of the day:
 - Turn off machine
 - Empty the tank
 - Check and clean scrap trays, wash and unblock rinse jets and wash arms
 - Wipe out machine
